### Skills

#### Javascript

Salesforce.com

#### Salesforce Lightning

Apex, Triggers, Batch, Schedulers

PHP, jQuery, HTML, CSS

Chrome Extension Development

#### ReactJS, NodeJS

### Certificates

Jun 2019

Salesforce Certified Administrator

I love coding && debugging;

Having 6 years of development experience in **JavaScript** and since last 3 years working on Salesforce (**Lightning**) customization & development. Worked on the projects from scratch till their completion, and also hands-on experience in chrome extension development.

I am always eager to learn new things and helping community members from the online communities like StackOverflow, Experts Exchange.

### Experience

### Projects

#### AppExchange Application

Role: Lead Developer

It's an accounting system, developed it on the salesforce platform. The main challenge was the reports where we need to show the previous n-years data with all accounting calculations and export the same in Excel and PDF.

Tech Stack: JavaScript, Salesforce.com, Apex, Lightning, AppExchange.

#### Lightning Community

Role: Developer

Implemented Napili based Community to show customers related data with graphs/charts also provided custom UX to manage records right from the community.

Tech Stack: JavaScript, Salesforce.com, Apex, Lightning Community.

#### BoxOffice

Role: Lead Developer

A complete system(front-end and administration) to take care of your all the events with just a few clicks.

Tech Stack: JavaScript, PHP, MySQL.

#### Taggbox

Role: Lead Developer

Displays your Social media Stories in different formats, developed this project from scratch and integrated 10 Social media platforms to fetch real time data and payment gateway.

Tech Stack: JavaScript, PHP, MySQL, RESTApis.
